PERSONAL PROJECTS

E-Commerce Shop — *Full-Stack MERN Website*

Developed in MERN technologies along with Redux. The app has E-commerce features like shipping, add to cart, payment (credit card integration).

Socialize — *Full-Stack MERN Website*

In this project, We can register, authenticate and redirect new users. Users can check out each other's profiles like other social media platforms. Users can post a photo and can like a post.

Mini-Instagram — *React, Firebase*

A mini Instagram-type image gallery application using ReactJs with Firebase and some cool animations.
The application has the functionality to upload and retrieve images from firebase and show them in the gallery.

Daily Situation Report — *Flutter, PHP/MySQL application*

A Project by Higher Education Department Govt. of KPK for collecting and monitoring daily situation reports of COVID-19 from Colleges and Universities.

E-Tutor— *Flutter, Firebase, Nodejs/Express application*

The E-Tutor app is a tool to assist the students/parents to find private tutors in an interactive manner using Google maps. It aims to complement the efforts of a student to find a desirable teacher.

Students Portal System— *Full-Stack PHP/MySQL application*

An online gateway where students can log into a website to access and check important program information regarding their classes, teachers, and general schooling easily.
Created as a university project.

MINI PROJECTS

- ❖ Reading List application in React using Context & Hooks.
- ❖ Bankist application in Vanilla JavaScript.
- ❖ Data Monitoring application in Flutter.
- ❖ Food Menu application in React using Hooks and Routers.
- ❖ GitHub User's Finder application in React using GitHub API

TOOLS

- ❖ Visual Studio Code
- ❖ Android Studio
- ❖ Pycharm
- ❖ Jupyter Notebook

FIELDS OF INTEREST

- ❖ Data Science
- ❖ Blockchain / Web 3.0
- ❖ Cloud Computing
